Introducing

T I M E

Tissue non-viable	Inflammation and/or infection	Moisture imbalance	Edge of wound not advancing
necrotic tissue or slough present	high bacterial counts, increased exudate surface discolouration or increased odour	heavy exudate - risk maceration, or dry bed - risk of desiccation	e.g. chronic wound with prolonged inflammation

proudly presented by

TIME* Wound Care

keynote speaker

Melanie Monk

BA/BCom. Business Manager, Healthcare Division,
Smith & Nephew Pty Ltd

“Introduction to TIME* - Assessing Chronic Wounds & Supporting the Healing Process”

Melanie has worked in both hospitals and community channels over the past 5 years. Previously, her background has been in marketing with a strong emphasis on Antibiotics and Antivirals.

Tonight Melanie will introduce you to TIME* - Assessing Chronic Wounds and Supporting the Healing Process. Her question to you is...
“with all the dressing options available, what is the best wound dressing option to aid healing?”

Wound Bed preparation is an essential process to obtain maximum benefits from today’s advanced wound care products. Preparing the wound bed can be achieved by the removal of barriers. Removing these barriers may accelerate healing or facilitate the effectiveness of other therapeutic measures. Wound bed preparation can be defined as the process of removing local barriers which may facilitate healing and provide a more efficient means of wound management.

The TIME* principle provides a systematic approach to the management of wounds, by focusing on each stage of wound healing. Removing these barriers allows the wounds to heal. TIME is based on intervention in four clinical areas and leads to an optimal well vascularised wound.

This is an opportunity to acquire an assessment tool and learn where to apply it. You will learn to select an appropriate dressing based on what the wound is doing at any point during the healing process.

OAPL™ in conjunction with Smith & Nephew™ invite you to attend an introductory seminar on
TIME* Wound Care

Date: Wednesday, 20th August 2008
Time: 6:00pm - 8:30pm
Venue: Quest SXY Apartments
Conference Room
27-29 Claremont Street, South Yarra

Event Program

6:00pm	Arrival. Welcome drinks and nibbles
6:30pm	Welcome Address
6:40pm	TIME* Introduction with Melanie Monk
7:15pm	Break and nibbles
7:30pm	TIME* Wound Care presentation continued
8:15pm	Question and Answer Session
8:30pm	Close

RSVP: 13th August 2008
